

PANTHER POST

Exciting Progress on School Improvements

As a vital part of our School District's future, I am thrilled to share an update on the school improvements that have been made possible by our 2021 capital project bond millage. Thanks to the Redford community's unwavering support, we are making significant strides in enhancing our educational facilities, directly impacting the experiences of our students and enhancing the value of schools within all that Redford Township has to offer families.

Our secondary campus is buzzing with activity as construction workers diligently work on the new addition – all without impacting the learning experience for our students. This project is the centerpiece of our improvement plans, and we are committed to having this state-of-the-art facility ready for our students by the start-up of next school year in late August. Watching the transformation unfold has been an inspiring journey for our entire school community.

One of the most exciting developments so far has been the construction of the new wing to the West of our existing Secondary Campus building that includes a new gymnasium, weightroom, and dedicated space for our Early College program. The rafters have been added to the competition gym, shaping a space that will not only host sporting events but also serve as a hub for various school and District activities. This new gymnasium is set to become a vibrant center of student life and athletic excellence.

Construction of the new “Main Street” wing is also in its early stages. This new addition will feature a secure vestibule entry for our High School, conveniently accessible offices for our student support staff and families who need to access those services, and new warm and inviting spaces for our students to access throughout the school day. Looking ahead, we are excited to announce that work on the new outdoor stadium is scheduled to begin in the early spring. This facility will provide our sports teams with a true home-field advantage and will serve as a community gathering spot for future events.

The construction of these new facilities is about more than just bricks and mortar. They represent our commitment to providing the best possible educational environment for our students. These enhancements will strengthen the quality of the educational experience and bolster school pride and spirit. We envision these new spaces as places where memories are made, talents are nurtured, and the spirit and traditions of our school community are celebrated.

None of this would be possible without the support of our community. Your vote of confidence in passing the bond millage is a testament to your commitment to our students' futures. We are deeply grateful for your trust and support in this endeavor.

Stay tuned for more updates as we continue to transform our School District into a beacon of educational excellence. Together, we are making a difference in the lives of our students.
