## **Redford Union High School Celebrates Early College Success**

Five Redford Union High School students were recently inducted into the Phi Theta Kappa Honors Society at Wayne County Community College, marking a remarkable milestone in their academic journey.

Alonzo Jones, Jr., Jason Hoehn, Nasir Rashed, Raven Leonard, and Ximena Suarez-Lira have all demonstrated great dedication and excellence in their studies, completing at least 12 credit hours at WCCC with a cumulative GPA of 3.5 or higher. Their hard work and commitment have not only earned them recognition but have also paved the way for a bright future ahead.

At the heart of this achievement lies RUHS's Early College and Careers program, an initiative that empowers students to embark on a dual-enrollment pathway and focus on the future of their education and careers. Through this program, students have the unique opportunity to attend college courses half-time throughout their high school journey. This innovative approach not only enriches their learning experience but also accelerates their academic growth.

One of the most remarkable aspects of the Early College and Careers program is its full funding through the District and the State of Michigan. This means that students have access to a wealth of resources, including calculators, books, lab equipment, and more, all covered through the program. By removing financial barriers, we ensure that every participating student can fully embrace the opportunities that come their way.

The induction of these five students into the Phi Theta Kappa Honors Society is a testament to the success of the Early College and Careers program and the dedication of our students. We applaud their remarkable achievements and celebrate their commitment to excellence.

As we continue to nurture the talents and aspirations of our students, we look forward to witnessing more moments of triumph and success in the years to come. Congratulations to our honored students, and may their journey inspire others to reach for the stars!
